KANSAS QUARANTINE RULES. The Kansas and Missouri live stock sanitary boards desire to bring more fully to the notice of the public their recent rulings in regard to the movement of dairy cartle. Prelamations have been is-sued, but as yet it seems that the information is not general. The gist of their recent regulations in this connection is that all breeding and dairy cattle from east of the Mississippi river and from lowa and Massachusetts, if without certificates, must pass the tuberculin test before they will be allowed to be offered upon the Kansas City market. This appiles to bulls and she stuff, but does not include steers or caives under six months of age. Several shipments have been held up at Kansas City within the last month, which occasioned considerable au-norance to the shippers, and the boards desire further publication of these rules in order to obviate future misunderstand-

During the session a sport of lineral offerings from an insuential large trader caused a dip, but this was recovered, helped by the visible decrease of 2.196,000 bushels.
